- High Security Level

Online Tool

- It's not a software, is a tool
- It can be accessed from ANY computer with an internet connection
- No installation
- No Download
- Simple Sign-in

Who may take advantage of these solutions?

New entrepreneurs who would like to get into the highly promising industry of Voice over IP without hefty investment costs and complicated set-up and maintenance processes.

Existing Internet Cafe, Call Centers, hotel owners looking to expand their customer base by using their current infrastructure to offer additional services. Traditional PSTN and Callshop owners wanting to reduce costs and boost profits by simply 'switching' or upgrading to VoIP-based systems.

DeltaThree solution enables people to make long distance and international phone calls at considerably lower prices as compared to the PSTN. It is a lucrative business due to its low initial business-entry investments and the stable increase in potential customer base.

Our system runs inside each CallShop and manages all activities inside the shop. It provides full booth management and generates real time status of each both. It allows the callshop owner to set its own rates.

Activity Log	Recharge	Rebalance	View Large	Booths	General Settings	Rate Settings	Manage Operators	Manage Users	Reports
